

Under Mount Drawer Adjustment Instructions

Step 1 (Identify drawers requiring adjustment)

As a result of shipping and handling of product, drawers may require slight adjustment. LCH product (with under mount drawer guides) have a customer friendly drawer adjuster that allows the customer the ability to easily adjust drawers 2 to 3 mm in height location. The un-equal spacing of drawers as shown to the left can be adjusted with minimal effort, to have a consistent spacing.

Step 2 (Locate the Under Mount Drawer Adjusters)

There are various types of under mount drawer adjusters that are used on LCH product, depending on the specified drawer guide for each particular customer. The adjusters are located on the bottom front corners of the drawer and will be similar to the adjusters shown in the photo to the left. Roll the wheel back and forth to raise and lower the drawer.

Step 3 (Adjustment Complete – Desired Appearance Achieved)

The drawer should be adjusted to have a consistent spacing as shown in the photo to the left.
